BUSINESS FINANCIAL PERFORMANCE

Revenue, profitability and financial efficiency

POWER BI DASHBOARD PRESENTATION | FY 2023

BUSINESS QUESTION & SCOPE

What the dashboard is designed to answer

FOUR BUSINESS QUESTIONS

- Which business lines generate the strongest margin?
- How do expense subgroups move across the months?
- How does expense-to-revenue efficiency change?
- How do monthly patterns differ by business line?

DATA & REPORT SCOPE

580 records | 3 business lines | FY 2023

The dataset covers January–December 2023. It supports monthly comparisons within the year, but not year-over-year analysis or confirmation of recurring seasonality.

Reporting period: January–December 2023

FINANCIAL SNAPSHOT

Full-year position across all business lines

TOTAL REVENUE

$17.56M

FY 2023

TOTAL EXPENSES

$13.25M

Recorded expenses

NET PROFIT

$4.31M

Revenue less expenses

PROFIT MARGIN

24.57%

Net profit / revenue

FINANCIAL EFFICIENCY

EXPENSE-TO-REVENUE

75.43%

$0.75 expense per $1 revenue

REVENUE-TO-EXPENSE

1.33x

$1.33 revenue per $1 expense

INTERPRETATION

About $0.25 profit remained per $1 of revenue, based on recorded expenses.

PERFORMANCE BY BUSINESS LINE

Revenue scale and profitability are not the same thing

SPORTSWEAR MARGIN

40.20%

Revenue $6.81M | Profit $2.74M

SPORTS EQUIPMENT MARGIN

25.71%

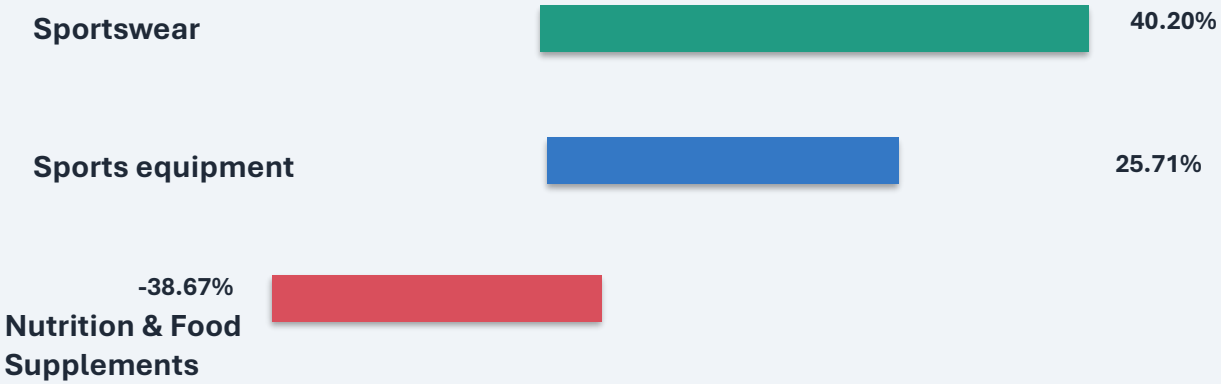

Revenue $8.91M | Profit $2.29M

NUTRITION & SUPPLEMENTS

-38.67%

Revenue $1.84M | Loss $0.71M

PROFIT MARGIN COMPARISON

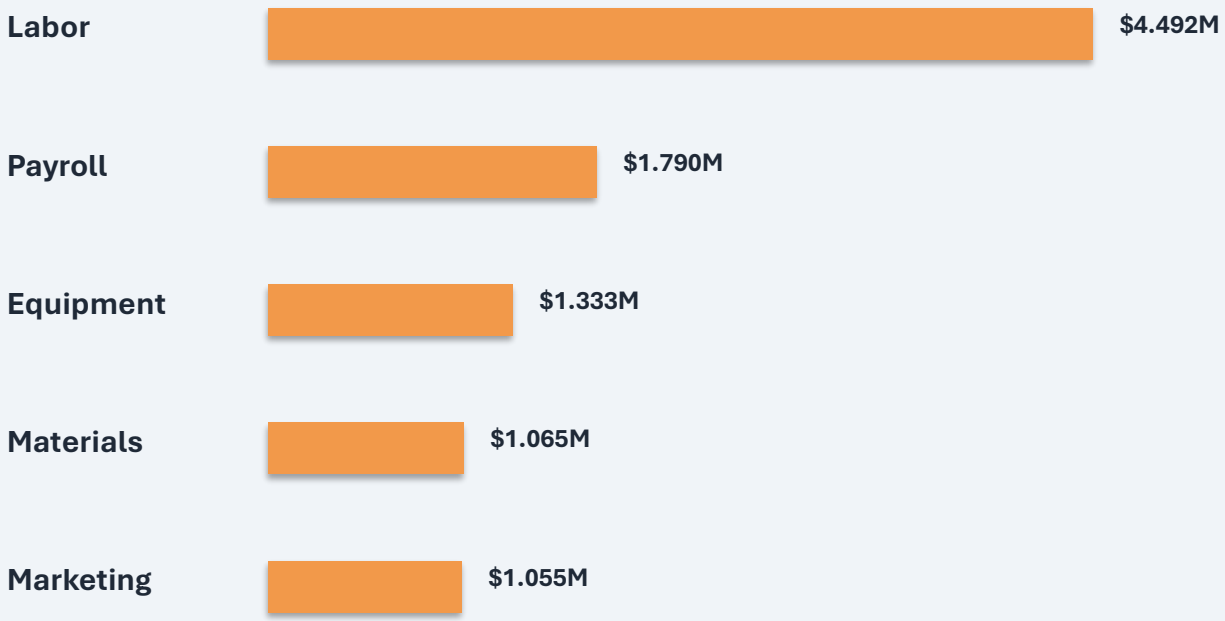

KEY TAKEAWAY

Sports equipment generates the most revenue, but Sportswear delivers the strongest margin. Nutrition & Food Supplements records expenses above revenue.

EXPENSE STRUCTURE

Where recorded expenditure is concentrated

LARGEST EXPENSE SUBGROUPS

WHAT THIS MEANS

- Labor is the largest recorded expense subgroup at approximately $4.49M.
- Payroll is the second largest at approximately $1.79M.
- Together, Labor and Payroll represent about 47.4% of total expenses.

A high expense is a prompt for investigation—not proof of inefficiency or avoidable cost.

MONTHLY FINANCIAL EFFICIENCY

Expense-to-revenue ratio across 2023

MONTHLY EXPENSE-TO-REVENUE RATIO

WHAT TO NOTICE

- The ratio changes across months rather than remaining constant.
- A higher ratio means a greater share of revenue is consumed by recorded expenses.
- Review revenue and expense amounts together to explain peaks.

Monthly movement is descriptive; one year of data cannot establish recurring seasonality.

RECOMMENDATIONS & CONCLUSION

Turning financial signals into management questions

- Investigate Nutrition & Food Supplements: review pricing, product mix and cost allocation.
- Understand what drives Sportswear's stronger margin and assess transferable practices.
- Review Sports equipment's cost structure while protecting its revenue contribution.
- Monitor Labor and Payroll alongside staffing, productivity and operational activity.
- Track monthly expense-to-revenue movements and investigate the underlying drivers.

BOTTOM LINE

Sportswear leads on margin. Sports equipment leads on revenue. Nutrition & Food Supplements requires a profitability review.
